

POWER & DISTRIBUTION TRANSFORMER

100 KVA - 1000 KVA

www.exultedindia.com

Standard Fitting

1. Earthing terminals -2 Nos
2. Lifting lugs
3. Oil Level indicator (Plain)
4. Drain-Cum bottom filter valve with plug
5. Oil filling hole with plug on conservator.

6. Oil conservator with drain plug.
7. Air release plug.
8. Silica-gel air breather.
9. Bi-directional flat rollers.
10. HV terminals outdoor bushing.
11. LV terminals outdoor bushing.

12. Radiators.
13. Filter valve with plug.
14. Thermometer pocket.
15. Oil temperature indicator.
16. Externally operated off circuit tap changing switch..
17. Explosion vent.

Optional Accessories

1. LV and HV cable boxes.
2. Winding temperature indicator(WTI).
3. Buchholz relay.
4. Magnetic oil level gauge.

5. Marshalling Box.
6. Disconnecting Chamber.
7. Oil temperature indicator with electrical contact (OTI).
8. Pressure relief valve.

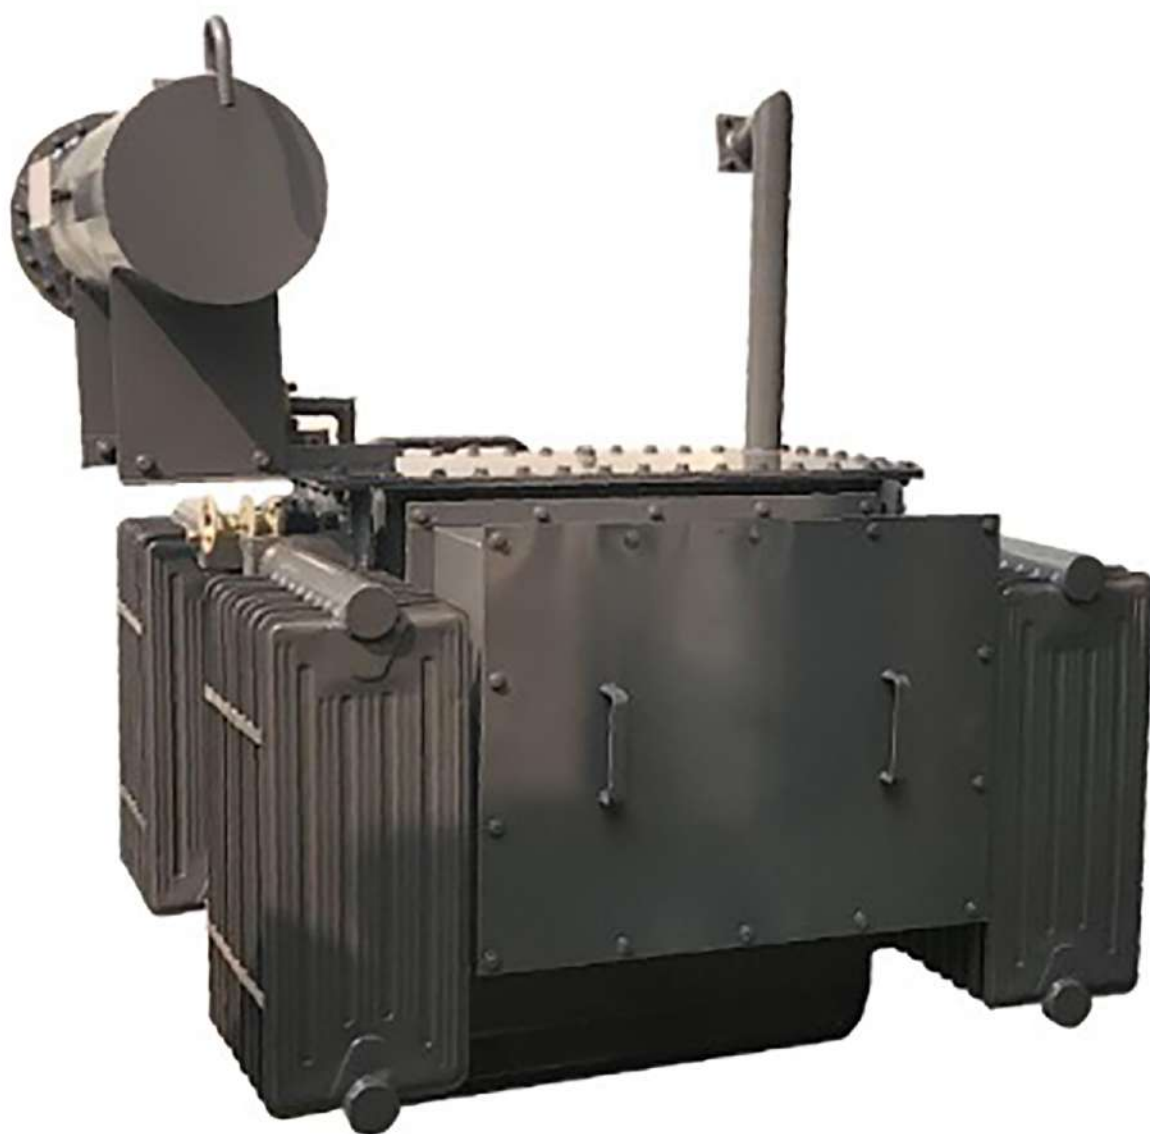

Routine Tests

All transformers are subjected to all routine test as mentioned

1. Insulation Resistance Test..
2. Turn Ratio Test.
3. Excitation current measurement.
4. Load losses measurement.
5. Dielectric Test.
6. Resistance measurement of winding .
7. No load losses measurement .
8. Impedance voltage test .
9. Insulation oil test .
10. Leakage test of transformer tank .

Quality

We ensure that every product manufactured is thoroughly checked and tested at our in-house testing facility as per specified"ISO Standards to meet our commitment to provide highly reliable,robust and versatile products in all respect.
